

# Standard solutions for CNC press brakes

CE and non CE design

1 MODEL CODE OF CONTROL BLOCKS SOLUTION

(1): to be used only with ESA/GV machine controller series KWARA

(2): special and not linear hydraulic characteristics

#### MODEL CODE OF PREFILLING BLOCKS

Prefilling block Prefilling size (2) 25, 32, 40 normally coupled with solution type PBA(C) 50, 63 normally coupled with solution type PBB(C)

(2): Other prefilling sizes or based on customized mounting surfaces available on reauest

New range of standardized electrohy-draulic solutions for CNC synchronized press brakes, available in CE or non CE

Standard press brake solutions are available in two sizes with different executions:

PBA(C), solution with central block design for small / medium machines, comprehensive of:

 central manifold including the proportio-nal pressure control, size 06 synchroni-zation servoproportional valves, safety valves

The PBA(C) solution is normally coupled with n°2 PFB-\* separated prefilling blocks, at choice size 25, 32 or 40 to be installed on the cylinders heads.

PBB(C), solution with modular blocks design for medium / big machines, comprensive of:

- Size 16 or 25 pressure control block.
- n°2 size 10, synchronization control blocks at choice to be installed on the prefilling blocks or assembled in any other point of the press brake.

The PBB(C) solution is normally coupled with n°2 PFB-\* prefilling blocks, at choice size 50 and 63 to be installed on the cylinders heads.

PBAC, PBBC designs are CE certified by BG or TÜV according to the EN 12622.

The PBA and PBB are the non CE version without monitored safety valves.

The following proportional controls available:

- For middle performances presses:
- non CE certified execution (PBA and PBB) with electronic driver functions integrated in the machine
- as "A" plus on-off output to monitor the central valve position (safety condition) for CE certified execution (PBAC and PBBC). Electronic driver functions are integrated in the machine CNC
- For high performances presses:
  - servoproportional valves with integral position transducer and separated double card driver E-ME-T-21H (Eurocard format)
- servoproportional valves with integral position transducer and integral electronic driver

PBA(C) and PBB(C) solutions are also available with crowning option CR, consisting of a size 06 proportional reducing valve for the compensation of the machina to the compensation of the compensation of the machina to the compensation of the comp ne frame deformation, see sections 8, 9

# 3 TECHNICAL CHARACTERISTICS

Pressing Force (kN)	Pump flow (I/min)	Working pressure (bar)	Block solution model code	Proportional valve nominal flow at Δp 15 bar per edge (I/min)	Typical Prefilling valve size	Nominal prefilling valve flow in suction condition (I/min)	
400 - 1250			PBA(C)-0616-A (TFI)	PBA(C)-0616-A (TFI) 28, 40, 50 for control type A	25	150	
1250 - 2000		Up to 50 PBA(C Up to 315 PBB(C Up to 150	PBA(C)-0616-T(TE)	9, 18, 27 for control type T, TE	32	225	
2000 - 3000					40	350	
3000 - 6000	Lin to 150		PBB(C)-1016-A (TFI)		50	500	
6000 - 10000	Op to 150		PBB(C)-1016-T(TE)	80, 105 for control type A	63	800	
10000 - 15000	Up to 220		PBB(C)-1025-A (TFI) PBB(C)-1025-T (TF)	40, 60 for control type T, TE		defined,	

Note: The above data are indicative. The selection of the solutions must be checked by Atos according to the machine characteristics

# 4 MAIN CHARACTERISTICS

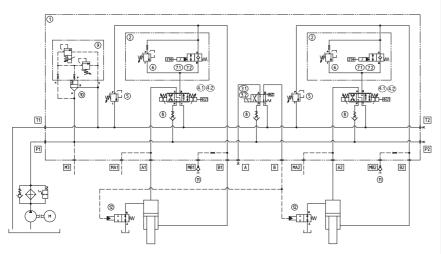

Ambient temperature	-20°C to +70°C for -A execution; -20°C to +60°C for -T and -TE executions.
Fluid	Hydraulic oil as per DIN 51524 535
Recommended viscosity	15 ÷ 100 mm²/s at 40°C (ISO VG 15 ÷ 100)
Fluid contamination class	ISO 18/15, achieved with in line filters at 10 $\mu$ m value to $\beta_{10} \ge 75$ (recommended)
Fluid temperature	-20°C +60°C

# 5 BLOCKS ASSEMBLING

Control block solution	Composition		Central chro block (TE)  ② Prefilling block
PBA-0616-A PBAC-0616-TFI	N° 1 central synchro block ① with size 06 proportional valves, driver functions integrated in the machine CNC, and size 16 proportional pressure control.  As PBA-06A plus proportional valves spool monitor for CE certified execution		Beam cylinders
PBA(C)-0616-T	N° 1 central block ① with size 06 servoproportional valves with position transducer and size 16 proportional pressure control. N° 1 driver E-ME-T-21H.		
PBA(C)-0616-TE	N° 1 central block ① with size 06 servo- proportional valves with transducer and integral electronics, size 16 proportional pressure control.	Beam	
Control block solution	Composition	① Synchro block (TE)	①Synchro block (TE) ② Prefilling block
PBB-1016-A PBB-1025-A	N° 1 proportional pressure control block size 16 or size 25 ③. N° 2 synchronization blocks ① with size 10 proportional valves, driver functions integrated in the machine CNC.	② Prefilling block ③ Pressure	Beam cylinders
PBBC-1016-TFI PBBC-1025-TFI	As PBA-10A plus proportional valves spool monitor for CE certified execution	Beam	Synchro blocks mounted on the prefilling blocks
PBB(C)-1016-T PBB(C)-1025-T	N° 1 proportional pressure control block size 16 or size 25 ③. N° 2 synchronization blocks ① with size 10 servoproportional valves with transducer. N° 1 driver E-ME-T-21H.	② Prefilling block ① Synchro block (TE)  Beam cylinders	① Synchro block (TE) ② Prefilling block ③ Pressure block
PBB(C)-1016-TE PBB(C)-1025-TE	N° 1 proportional pressure control block size 16 or size 25 ③. N° 2 synchronization blocks ① with size 10 servoproportional valves with transducer and integral electronics.		Synchro blocks mounted separated from the prefilling blocks
refilling block model code		Description	
PFB-25, 32, 40	Separated prefilling blocks ②, size 25, 32, 40	to be selected according to the machine char	acteristics - normally coupled with PBA(C) solution

#### 7.6 Installation dimensions of PBB(C) pressure control blocks

# PRESSURE CONTROL BLOCK size 16

Fastening bolts:

2 socket head screw M8x95 class 12.9

Port dimensions:

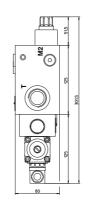

P = G 1"

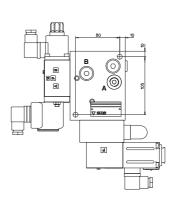

**T** = G 1"

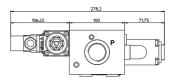

**A** = G 3/8"

**B** = G 3/8"

M2 = G 1/4"

# PRESSURE CONTROL BLOCK size 25

Fastening bolts:

2 socket head screw M10x115 class 12.9

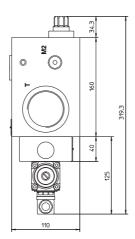

Port dimensions:

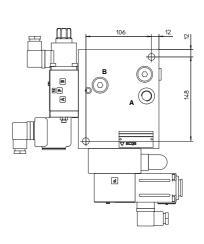

**P** = G 1"1/4

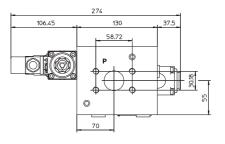

**T** = G 2"

**A** = G 3/8"

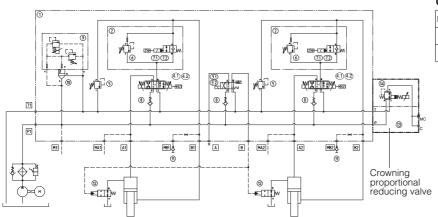

**B** = G 3/8" **M2** = G 1/4"

#### 8.1 Certified hydraulic scheme with crowning option (example with -TFI proportional control type)

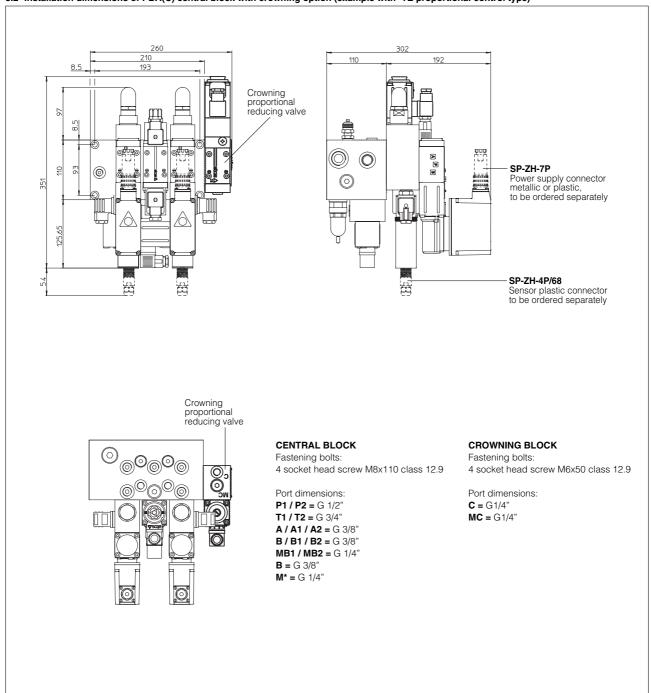

#### Composition of crowing option

Pos	Description	Atos code	PBA	PBAC
13	SUBPLATE		•	•
14	CROWNING PROP. REDUCING VALVE	RZGO-A-033	•	•

Note: the PBA solution has the same hydraulic scheme but without monitor signal on valves ③ and ⑦

#### 8.2 Installation dimensions of PBA(C) central block with crowning option (example with -TE proportional control type)

#### 9 CROWNING OPTION FOR MODULAR BLOCK DESIGN TYPE PBB(C)

# 9.1 Installation dimensions of pressure control block with crowning option for PBB(C) solution
